ELSEVIER

Volume 54, Numbers 1–4, October 1995

Journal of Materials Processing Technology

Contents

Editorial ix

A first step towards the modelling of the thermoforming of plastic sheets 1
P. Bourgin, T. Saint-Matin (Strasbourg, France), I. Cormeau (Gif-sur-Yvette, France)

A simple concept to achieve a rational chip form 12
M.I. Sadik, B. Lindström (Stockholm, Sweden)

Evaluation of the effect of sizing levels on transverse flexural and shear strengths of carbon/epoxy composites 17
D. Upadhyaya (ID, USA), P. Tsakiropoulos (Surrey, UK)

Application of frequency sensitive surfaces in electromagnetic shielding 21
H. Rahman, J. Dowling, P.K. Saha (Dublin, Ireland)

Effect of the green state on the sintering of Ti(C, N)-based cermets 29
S. Zhang (Singapore, Singapore), G.Q. Lu (Brisbane, Australia)

Advanced ceramic tools: an experimental assessment in turning tests 34
G.E. D'Errico, R. Calzavarini (Orbassano (To), Italy)

Plastics and their machining: a review 40
M. Alauddin, I.A. Choudhury, M.A. El Baradie, M.S.J. Hashmi (Dublin, Ireland)

Some aspects of the damage caused in metallic materials by ultrasonic vibrations 47
M.R. Sriraman, R. Vasudevan (Madras, India)

Aluminum nitride/metal composites using ultra-fine aluminum particles and their application for joining 54
K. Atarashiya (Sapporo, Japan)

The development of a production technique for magnets from mechanically-alloyed Fe–Nd–B powder 60
B. Daniel (Hereford, UK)

Systems for the prediction of process parameters 64
V. Narayanan (Singapore, Singapore)

A finite-element analysis of sheet metal forming processes 70
T.-C. Hsu, C.-H. Chu (Taiwan, ROC)

Investigation into the properties of friction-welded aluminium bars 76
B.S. Yilbaş, A.Z. Şahin, A. Çoban, B.J. Abdul Aleem (Dhahran, Saudi Arabia)

High-speed machining: an approach to process analysis 82
I.F. Dagiloke, A. Kaldos, S. Douglas, B. Mills (Liverpool, UK)

The relationship between inclusionary deposits and the wear of cutting tools 88
G. Bittès, F. Leroy, G. Auclair (Amneville, France)

Workability in forging of powder metallurgy compacts 97
M. Abdel-Rahman, M.N. El-Sheikh (Minia, Egypt)

Joining of Si_3N_4 to wear-resistant steel by direct diffusion bonding 103
A. Krajewski (Warsaw, Poland)

Elsevier Science S.A.

Use of the stretch zone for the characterization of ductile fracture 109
M. Nabil Bassim (Man., Canada)

Determination of forward slip in H-beam rolling 114
W. Zhang, C. Zhu (Qinhaungdao, China), G.E.O. Widera (Milwaukee, USA)

Elasto-visco–plastic finite-element analysis of a cold upsetting test and stress-state validation by residual-stress measurements 120
B. Michel, J.C. Boyer (Villeurbanne, France)

Three novel techniques for forming hemispherical cups with flexible tooling 129
S. Thiruvarudchelvan (Singapore, Singapore)

Forming of regularly spaced deep recesses on aluminium sheet metal panels 137
S. Thiruvarudchelvan, F.W. Travis (Singapore, Singapore)

Studies on the extension of the service life of large industrial fans 144
T. Hejwowski, A. Weroński (Lublin, Poland)

Photophysical and photochemical processes in fullerenes under high-intensity illumination 149
H.J. Byrne, W.K. Maser, M. Kaiser, L. Akselrod, J. Anders, W.W. Rühle, X.-Q. Zhou, C. Thomsen, A.T. Werner, A. Mittelbach, S. Roth (Stuttgart, Germany)

Fracture toughness of 20MnMoNi55 steel at different temperatures as affected by room-temperature pre-deformation 159
M.S. El-Fadaly, T.A. El-Sarrage, (Port-Said, Egypt), A.M. Eleiche (Guiza, Egypt), W. Dahl (Aachen, Germany)

Improving the durability of the electrodes for an air-plasma cutting system using the diffusion-bonding process 166
J. Szulc (Warsaw, Poland)

Statistical properties of the failure time distribution for $\frac{1}{2}$Cr$\frac{1}{2}$Mo$\frac{1}{4}$V steels 171
M. Evans (Swansea, UK)

Photoacoustic imaging of layered microcircuits for non-destructive evaluation sub-surface defects 181
U. Bernini, P. Russo (Naples, Italy), P. Mormile (Arco Felice, Italy), A. Novellino (Rome, Italy)

Shear spinning technology for manufacture of long thin wall tubes of small bore 186
R. Prakash (Chandigarh, India), R.P. Singhal (New Delhi, India)

Off-axes forming-limit stress diagrams of an anisotropic steel sheet 193
T. Nguyen Nhat, R. Arrieux (Annecy, France)

Methods of analysing thermomechanical stress in plastic packages for integrated circuits 199
O. Slattery, T. Hayes, W. Lawton, G. Kelly, C. Lyden, J. Barrett, C. O'Mathuna (Cork, Ireland)

Prediction of the residual strength of laminated composites subjected to impact loading 205
J.Y. Huang (Taiwan, ROC)

Generating solid models from two-dimensional representations 211
S.K. Ghosh (Siegburg, Germany), Y.B. Li, A.K. Munns (Dundee, UK), X.C. Wang (Xi'an, People's Republic of China)

Curvature sensing: a new concept in tracing technology 218
X.C. Wang, J.H. Mao, T.Q. Lai, X.T. Wu, (Xi'an, China), S.K. Ghosh (Lomar, Germany), Y.B. Li, (Dundee, UK)

A theoretical analysis of tube spinning using balls 224
M.I. Rotarescu (Sibiu, Romania)

A study on process improvements of multi-stage deep-drawing by the finite-element method 230
D.-K. Min, B.-H. Jeon, N. Kim, (Seoul, South Korea), H.-J. Kim (Chuncheong, South Korea)

An investigation of die–workpiece interface friction during the upsetting process 239
S.Y. Lin (Taiwan, ROC)

Powder particle structure formation during solidification in the process of metal atomization 249
V.V. Sobolev, J.M. Guilemany, A.J. Martín (Barcelona, Spain)

Effect of processing on the microstructural variation and heat-treatment response of a hypereutectic Al–Si alloy 261
M. Gupta (Singapore, Singapore), E.J. Lavernia (CA, USA)

Expert system for multi-stage cold-forging process design with a re-designing algorithm 271
H.-S. Kim, Y.-T. Im (Taejon, South Korea)

The prediction of cutting forces in the ball-end milling process 286
C.-C. Tai, K.-H. Fuh (Taiwan, ROC)

Formability in extrusion forging: the influence of die geometry and friction conditions 302
C. Giardini, E. Ceretti, G. Maccarini (Brescia, Italy)

A numerical analysis of neck formation in tensile specimens 309
T.K. Datta, D. Banerjee (West Bengal, India)

Computer-aided design of blockers for rib–web type forgings 314
J.C. Choi, B.M. Kim, S.W. Kim (Pusan, South Korea)

Tubular transition joint between zircaloy-2 and stainless steel 322
K. Bhanumurthy, J. Krishnan, G.B. Kale, R.K. Fotedar, A.R. Biswas, R.N. Arya (Bombay, India)

Analysis of the variation of the cold-rolling characteristics of rolling force, strip shape, stress and temperature, for a three-dimensional strip 326
Z.-C. Lin, V.-H. Lin (Taiwan, ROC)

Study on the turning characteristics of alumina-based ceramics 341
B.H. Yan, F.Y. Huang, H.M. Chow (Taiwan, ROC)

Processing and properties of pressureless-sintered Si_3N_4–SiC composites 348
V. Günay (Gebze, Turkey), S. Hampshire (Limerick, Ireland)

A novel hydraulic-pressure augmented deep-drawing process for high draw ratios 355
S. Thiruvarudchelvan (Singapore, Singapore)

A note on the effect of the mean stress in a new fatigue theory 362
H.-K. Oh (Suwon, South Korea)

Characterization of dynamic fatigue life by the uniaxial tensile test 365
H.-K. Oh (Suwon, South Korea)

Determination of fracture toughness by means of the uniaxial tensile test 372
H.-K. Oh (Suwon, South Korea)

Theoretical and experimental analysis of non-axisymmetrical deep drawing 375
E. Ceretti, C. Giardini, G. Maccarini (Brescia, Italy)

Shaping the distribution of plastic deformation through surface plastic deformation by means of tools employing once-only or periodic radial feeding 385
V.I. Grigorov, M.K. Karshakov (Rousse, Bulgaria)

Author Index of Volume 54 397

The publisher encourages the submission of articles in electronic form thus saving time and avoiding rekeying errors. A leaflet describing our requirements is available from the publisher upon request.
